

DISCOVERING THE WONDERS OF ANDAMAN

A 6 DAYS / 5 NIGHTS EXPEDITION

**BEACH LIFE. DIVING. HERITAGE. ISLAND
HOPPING. WILDERNESS.**

**DEPARTURE 24 APR
ARRIVAL 29 APR**

**FOR AGES
13-18**

WHAT MAKES THIS VACATION

Unique?

The Andamans are a part of India with a unique topography. To visit, no visa or passport is required. However, the Andamans can be expensive as all goods have to be brought in by ship from Kolkata or Chennai. The islands are powered by diesel generators, and flights to the Andamans are restricted to a limited number of days in a month!

Explore 3 magical islands, and walk along stunning beaches with crystal clear waters

Swim along exotic marine life (such as manta rays) & beautiful coral reefs during our sea-dive

Experience well-preserved ancient tribal habitats as well as colonial history

Day 1

SERENE BEACHES AND A DARK HISTORY

We depart from Bangalore at 11:15 AM via direct flight to Port Blair and land at 1:55 PM. After checking in and a relaxing lunch, we visit the Cellular Jail. This was a tool used to crush the independence movement in India. Freedom fighters from across the country were imprisoned here in horrible conditions. We learn about their lives and how the British system of colonization really worked.

Day 2

HAVELOCK - THE ISLAND OF ADVENTURE

After breakfast, we head to Havelock Island via a ferry ride across the sea. We then move on to visit Radha Nagar beach, an award winning beach known for its clear blue waters and cleanliness. This is a model of sustainably enjoying and preserving nature which other beaches in the country can emulate. Post lunch, we begin our adventure activities, dividing the batch into 3, for scuba diving, kayaking and tidal walk.

Day 3

TAKE A DIVE OR KAYAK
YOUR WAY IN, OR BOTH!

The adventure modules continue today after breakfast, where the batches are rotated to complete all the 3 modules. After the activities, we spend the late evening at leisure along the coast and hit the bed early for a good night's rest after a tiring day.

Day 4

A BLISSFUL RIDE ACROSS THE SEA

After a scrumptious breakfast, we visit the Elephant beach, which is one of the coasts filled with energy and thrill. Elephanta Beach is known for its watersports and snorkeling sites, and we'd spend the time enjoying the coral visible in the shallow waters.

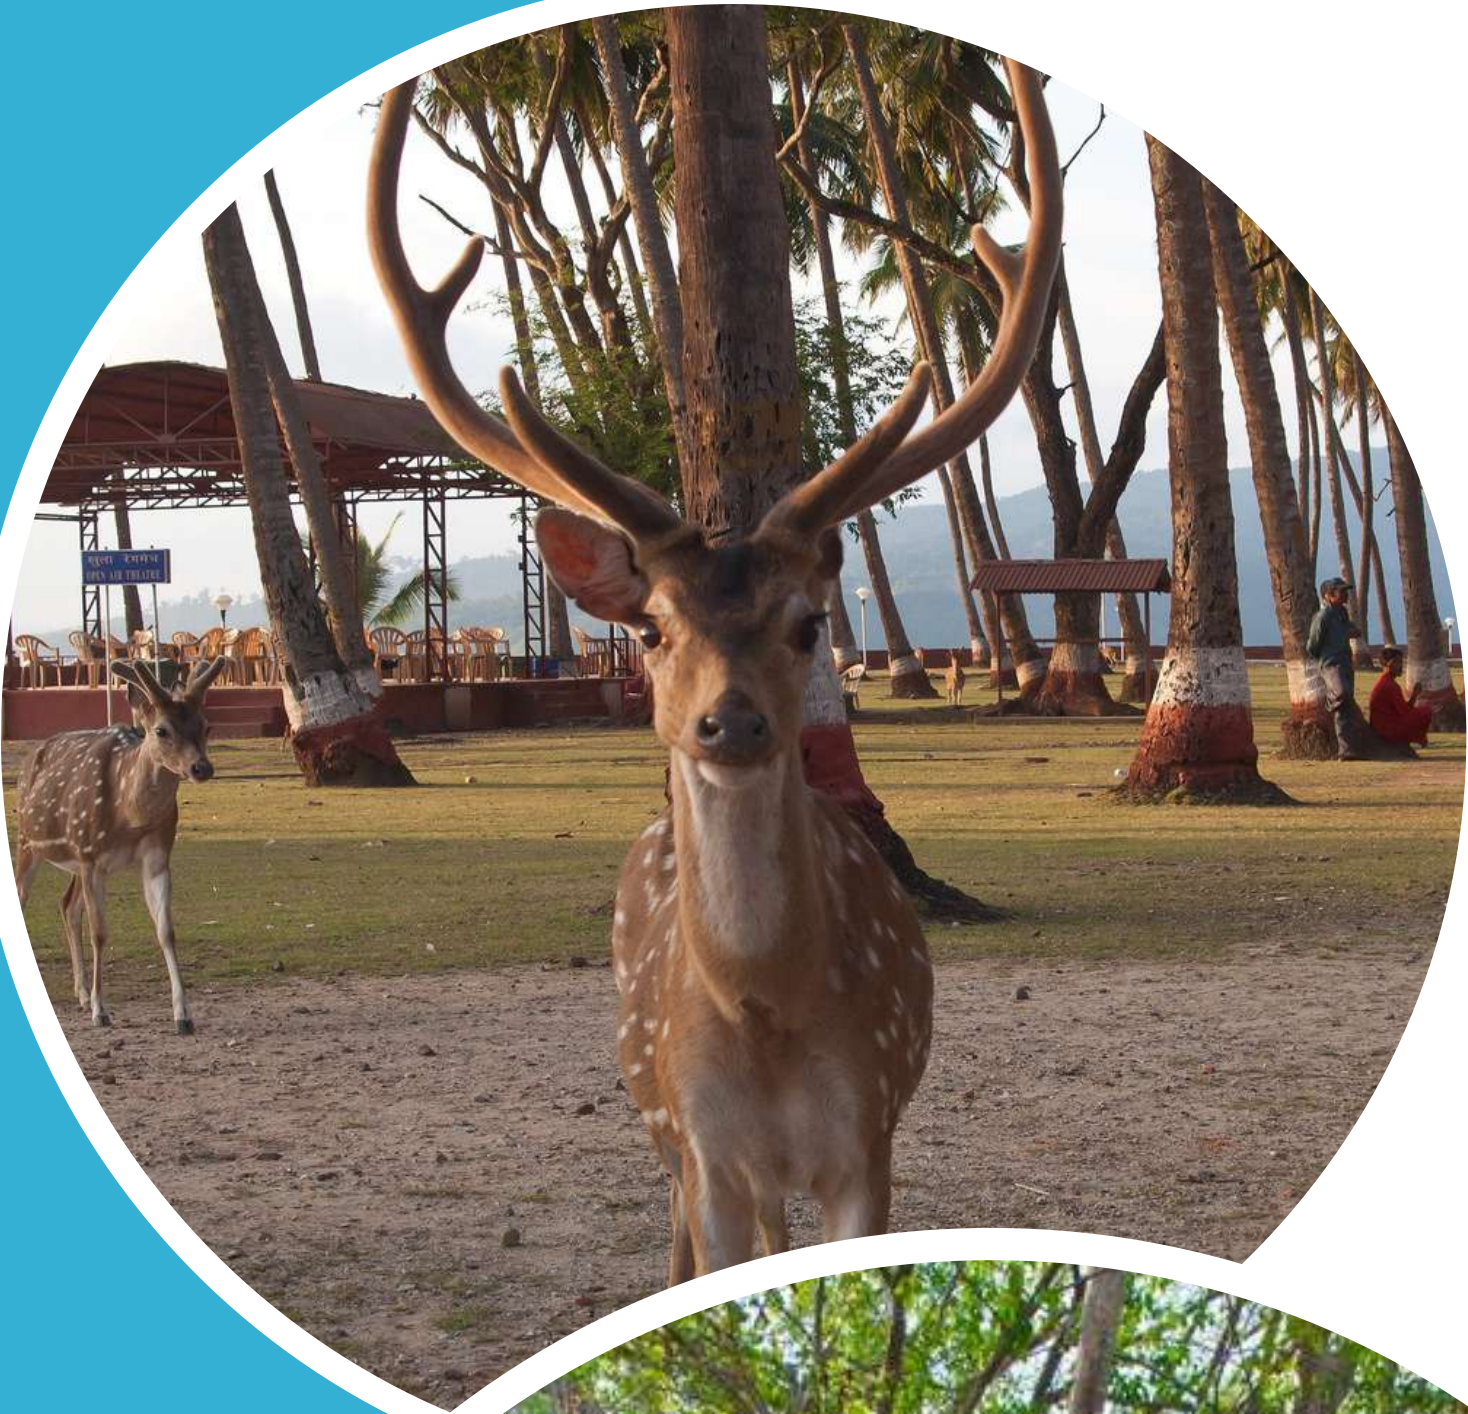

After lunch, we take the ferry back to Port Blair and spend the time leisurely around the hotel campus.

Day 5

AN ENTHRALLING DAY EXPLORING ECOLOGY

After breakfast, we explore the colonial ruins at Ross Island. This Island was the capital of the British in the Andamans. It housed soldiers as well as civilians, & the British administered the Andamans from here, using Indian slave labor to build the facilities. We spend the time exploring the navy base and monuments and also interacting with wildlife (deer). After lunch, time for an ancient ecology lesson at the Anthropological museum. It has an archive of tribal life in the Andamans. The early migrators out of Africa settled on the islands and lived there for thousands of years until discovered by the outside world.

Day 6

GOODBYES ON A GORGEOUS BEACH BACKDROP

Have breakfast and visit the Corbyn's Cove beach - our final module in the Andaman's. After spending the final moments with your friends at the beach, have an early lunch and head for the airport for the flight back home, arriving in Bangalore airport at 5 PM.

LEARNING MODULES COVERED

History Mapping

A walkthrough of the independence movement & colonial history

Marine Life Exploration

With activities such as kayaking, diving, we explore the aquatic systems

Ancient Ecology

Learn to the evolution of interactions between humans and environment
